

Student position in Business Development

Deadline: December 1st 2018

Chromologics is an early spin-out from the Technical University of Denmark (DTU). We combine deep tech entrepreneurship with fermentation technology for the creation of novel solutions for natural food colorants of fungal origin.

About the project

We are looking for support in business development to strengthen our business case and getting us ready for seed investment. So far, we experienced great interest for our red colorant and its application in foods, but we are now hoping to identify possible non-food applications to broaden our customer portfolio.

The day-to day work will take place at DTU Campus Lyngby, where Chromologics has an office and access to lab space.

Responsibilities and tasks

The successful candidate will work closely together with the rest of the Chromologics team and develop a business strategy for non- food applications of our colorant. This includes the study of market reports, customer interviews and drafting an initial business plan for the respective applications.

The candidate should enjoy pitching ideas to potential customers as well as representing Chromologics at fairs and other networking events. The candidate should also be able to graphically illustrate the results (power point and/or adobe illustrator).

Qualifications

- Currently enrolled in an business- oriented education with experience and passion for life sciences
- Experience with the drafting of business plans and the assessment of different business opportunities
- Initiative, reliability and drive
- A passion for start-ups
- Outgoing and proactive personality

We offer

Become part of the Chromologics team as a student helper, 1-2 days/week, for 6 months from 1.01.2019- 30.06.2019

Further Information

Please contact Gerit Tolborg (GTolborg@chromologics.com) ([+45 61603209](tel:+4561603209))

Chromologics Aps, 30 November 2018
